## **DETAILED ACTION**

1. Applicants' communication filed 02/02/04 has been carefully considered by the examiner. The arguments advanced therein are persuasive with respect to the rejections of record, and those rejections are accordingly withdrawn. In view of a further search and reconsideration, however, a new rejection is set forth further below. This action is not made final.

## Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 23 - 26, 29 - 31 and 34 - 44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

An operable transistor requires to have a gate, a source and a drain. However, the present invention only discloses the techniques to etch a stack of layers to form a gate stack. Since this gate stack is an intermediate structure of a transistor, it is not operable.
